

12<sup>th</sup> Allianz Motor Day

## Fact Sheet 12th Allianz Motor Day

<b>Title</b>	12th Allianz Motor Day “Big vs. small”
<b>Time</b>	Wednesday, 16 October 2023, from 10 a.m. to 12.30 p.m.
<b>Location</b>	Allianz Center for Technology (AZT), Ismaning
<b>Topic</b>	<p><b>“Big vs. small“ - Road safety in cities</b></p> <p>With increasing urbanization, traffic space is increasingly becoming a scarce resource for which the various road users are competing. This increases the risk of accidents for everyone involved. Vulnerable groups such as pedestrians and cyclists are particularly affected. In 2022, 80 percent of fatal accidents in German cities involved pedestrians, cyclists or motorcyclists. Across the EU, the figure is 70 percent. In addition to cars, trucks pose a particularly high risk. Only 6.1 percent of all vehicles registered in Germany are trucks. However, they are involved in 22 percent of fatal road accidents.</p> <p>Reason enough for us to take a closer look at delivery traffic in cities at the 12th Allianz Motor Day. We will look into the question of which trades have the greatest accident risk and which have the lowest. And we will discuss with you how we can better protect vulnerable road users. In addition, we will exclusively present a current survey and the results of an accident research project by the Allianz Center for Technology (AZT).</p>

12<sup>th</sup> Allianz Motor Day

## Fact Sheet 12th Allianz Motor Day

<b>Participants</b>	Experts from the automotive industry, science and research as well as Allianz board members
<b>Host</b>	Frank Sommerfeld - CEO Allianz Versicherungs-AG
